

Laser Star Fields

Blisslights transforms any space into a magical dreamland complete with twinkling stars and an ever-transforming nebula cloud that follows the path of the universe. Thousands of stars, moving on unique trajectories tickle your imagination as you sit back and absorb the beauty emanating from the light. We make paintings out of light that must be experienced with your own eyes to appreciate the fine attention to detail in each work of art.

Take your Blisslight outside and point it at a tree. Close your eyes and pretend to sprinkle Pixie Dust. Open your eyes and turn on your Blisslight - thousands of magical fireflies begin to fly around the tree. Easily transform large outdoor shrubs, trees and plants and add a touch of creative elegance with your Blisslight.

These pictures show some of the possibilities. The units are easy to use, just plug them in!

Blisslight-50 - \$2995.00
W/DMX - \$4000.00

The Blisslight-50 is the pioneering product that started the Blisslight magic. This flagship model incorporates our lighting elements and optics to create an enormous universe of stars. It can cover areas larger than 50' X 50'

WOW! That's what people say when they first see the Blisslight, but words cannot accurately describe the experience. This is truly the coolest most amazing light show you will see anywhere! Seeing it challenges your sense of reality.

It's a technological masterpiece with its rugged construction, multi-position mounting system, optional DMX interface and fan less cooling-low noise operation. We custom developed the multiphase diffractive holographic optics and light projection technology. The projector is true plug-and-play. Just plug in the box, turn it on and you are finished setting up in a matter of seconds.

- * Patented Holographic Technology
- * Transforms rooms into Your Own Personal Animated Universe
- * Creates Thousands of Stars with or without Cloud Formations
- * Look for the occasional Shooting Stars Across the Night Sky
- * This is an Experience You Will Never Forget
- * Simple to Use, Just Plug It In

Blisslight-15 - \$995.00

The physical size and light source of the Blisslight-15 is smaller than the Blisslight-50, but the WOW factor is still FULL SIZED! The moving stars, the transforming nebula cloud, low noise-fan less operation, rugged construction, multi-position mounting system, and plug and play functionality are included. It creates the same universe of stars in a smaller area. It is capable of covering a 25' X 25' room.

Watch as thousands of moving stars and nebula cloud move and transform, overwhelming you with a calming blissful feeling.

LS-20G Green - \$ 995.00
LS-210R Red - \$2995.00

The BlissLights LS projectors create an explosion of thousands of moving pin points of light. The technology incorporates laser and optical elements to create a breathtaking effect much like a universe of stars.

The Bliss Light LS projectors are specifically developed with a weather proof enclosure for permanent outdoor installations. In addition to the incredible starry night effect, when the Blisslight LS projector is pointed toward trees and bushes, they come alive with light.
